

**FOR IMMEDIATE RELEASE**

## Brookstone Builders, Inc. Completes Shipyard Renovation Project

**MANCHESTER, NH** – (January 9, 2017) **Brookstone Builders, Inc.**, construction managers and general contractors headquartered in Manchester, New Hampshire, recently announced that they have completed a renovation project at the **Portsmouth Naval Shipyard** in the paint-blasting facility, also known as building 284.

The scope-of-work encompassed select interior demolition, reconstruction of floors and utilities, lighting upgrades, the relocation of steam water and sewer systems, and the construction of a complete office building within a large existing warehouse.

The initiative was conducted to accommodate the relocation of personnel from another building, at the shipyard, which was scheduled for demolition.

**Erik Crisman** was Brookstone Builders' Project Manager, and Brookstone Builders was a subcontractor on this project, with **CCI Energy & Construction Services LLC** of Augusta, Maine serving as the primary contractor.

"We have truly enjoyed our professional business relationships with both the Navy and CCI," said Brookstone Builder's President **Paula Scales**. "Our crews were well-suited to meeting the precise time-frame associated with this project, and the Navy's streamlined processes and communication protocols were very helpful in keeping all phases of the job on track as well."

A woman-owned enterprise, **Brookstone Builders, Inc.** was founded in 1984. The company provides commercial, industrial, and design-build solutions throughout northern New England, and has also been involved in a wide range of specialty and renovation projects.
